

Dear Recruiter,

My name is Carlos Daniel Duarte León, and I hold a Bachelor's degree in Computer Science with a strong technical foundation and a genuine passion for web development. Throughout my professional and personal journey, I've discovered that what truly drives me is building functional solutions and understanding how each layer of a system works.

I consider myself a self-taught, proactive, and adaptable person, which has allowed me to learn technologies such as HTML, CSS, JavaScript, React, Firebase, and Google Apps Script, among others. I built my personal portfolio (<https://kinio-1998.github.io>) from scratch using React and Firebase, applying best practices in both frontend and backend development.

Beyond my formal education, I've worked on personal projects focused on task automation using Apps Script and Python. I also have experience as an incident analyst, where I handled databases and analyzed full-stack system flows, which gave me a broader understanding of how software works end to end.

While my main focus is web development, I am also deeply interested in data analysis and data science. I am open to exploring new technologies or disciplines that help me grow and contribute meaningfully to any team.

I am currently seeking a remote or in-person opportunity anywhere in the country, where I can bring value, collaborate effectively, and continue to grow as a developer.

Thank you for your time and consideration.

I look forward to the opportunity to contribute and learn with your team.

Sincerely,

Carlos Daniel Duarte León

B.Sc. in Computer Science

A handwritten signature in black ink, reading "León Duarte". The signature is written in a cursive, flowing style. The first name "León" is on the top line, and the last name "Duarte" is on the bottom line, with a long horizontal stroke extending from the end of "Duarte" to the right.
